Answer choices points:

Yes = 1 point

No = 0 points

Interpretation

▪ GDS <5

This score is not indicative of a depressive status, however the patient should be monitored further for any more signs displayed and also for their evolution.

▪ GDS ≥5 and <10

This score is indicative of a depressive status in a mild to moderate severity. The patient needs to be referred to further specialist consultation.

▪ GDS ≥10

This score is indicative for the presence of a severe depressive status. The patient needs to be referred to further specialist consultation.
